The code under review: `commit 6252fc1ac19cbbf46914bec60d0e423fe20896f2`

Date of the review: November 11, 2015

Name of the author of the code under review: Nadeem Haidar

Poor code Logic- Inefficient code

Location: `chrome/content/zoteroEXTended/zoteroEXT.js`, function `removeButtonClick`, lines 50 - 71

```
removeButtonClick: function() {  
    var selected =  
    this.getSelectedTags('remove-tag-list');  
    Zotero.ExtBatch.removeTags(selected);  
}
```

Issues: The function calls another function “`Zotero.ExtBatch.removeTags(selected)`”. This is inefficient, because instead of doing this, we can simply remove this function and do all that work in the `removeTags` function itself.

Fix: Remove this unnecessary function and paste its code into `ExtBatch.removeTags`
